How to Invest in Bitcoin in 2018

[Notes and Comments](#)

You can edit this content yourself.

B *I* ~~S~~ U “ ” ▾ ≡ ≡ ☯ </>

The value of bitcoin has risen about 1800 percent since January 2017. That makes bitcoin an attractive investment for 2018.

Before investing in bitcoin, however, you should understand the different ways of making such investment -- such as the different exchanges available, and different bitcoin investment options -- as well as newer types of bitcoin investment opportunities, such as bitcoin ETFs.

What Is Bitcoin?

Released in 2009, bitcoin is the oldest and best known digital currency built using blockchain technology.

Bitcoin is a way to make payments securely and anonymously (although there are limitations: bitcoin transactions can sometimes be traced, and investing in bitcoin sometimes requires proving your real-world identity).

Dozens of other blockchain-based digital currencies exist alongside bitcoin, but bitcoin remains the original and most highly valued digital currency.

Why Invest in Bitcoin?

The most obvious reason to invest in bitcoin is that the value of bitcoin versus traditional currencies, such as the U.S. dollar, has climbed very steadily over the past several years.

Other reasons to invest in bitcoin include:

- Its value is virtually unaffected by fluctuations in the stock market. This makes bitcoin a good asset for diversifying portfolios beyond stocks.
- No single authority controls bitcoin or guarantees its value. As a result, a government shutdown would not cause uncertainty for the value of bitcoin in the same way that it would for currencies such as the U.S. dollar.
- Bitcoin can be bought and sold very easily by individual investors, for minimal exchange fees. This makes bitcoin more attractive than investing in the stock market, which can require more skill on the part of the investor and sometimes involves paying large commissions to middlemen.

Of course, bitcoin investment is not without risks and drawbacks, which include:

- Bitcoin is highly volatile. Although bitcoin's value climbed relatively steadily overall in 2017, price drops of 20 percent or more in a single day are not uncommon. In the less recent past, price drops of more than 90 percent occurred.
- The use of bitcoin for real-world transactions today remains limited. Bitcoin's value is therefore driven largely by speculation. People want it because its supply is limited and they believe it will become widely used in the future. In this respect, bitcoin is a riskier investment than other investment instruments that are linked to present-day value.

How Can You Invest in Bitcoin?

There are several ways to invest in bitcoin:

- *Using a bitcoin exchange.* (For a ranking of bitcoin exchanges, click [here](#).) Using an exchange, you can buy bitcoin in U.S. dollars. Most exchanges charge a small commission, which varies depending on the volume of the exchange and your method of payment.
- *Buying in cash.* Matchmaking sites like [Local Bitcoins](#) pair people who want to sell bitcoin to people who want

- *Buying in cash.* Matchmaking sites like [LocalBitcoins](#) pair people who want to sell bitcoin to people who want to pay for them in cash. To use this option, you have to deposit cash in a physical location; however, this approach can be more private because it does not require registration with an exchange.
- *Mining.* Rather than purchasing bitcoins, you can "mine" them by performing the computations required to add new bitcoin to the blockchain. Mining requires specialized hardware and consumes a lot of electricity, which means it is not always cost-efficient and is difficult to set up -- although cloud-based bitcoin mining platforms are available in which you essentially pay someone else to mine bitcoin for you on their servers.
- Investing in bitcoin ETFs (keep reading for more on these).

Can You Invest in Bitcoin ETFs?

Bitcoin ETFs, which track bitcoin futures, have been rising in popularity, and are set to [become available soon](#) on major stock exchanges.

Bitcoin ETFs are an attractive investment option for people who want to add bitcoin to their portfolios while working within their traditional investment frameworks. Bitcoin ETFs may also be more cost-effective for some investors since they can be purchased directly.

How to Invest in Bitcoin in 2018

The value of bitcoin has risen about 1800 percent since January 2017. That makes bitcoin an attractive investment for 2018.

Before investing in bitcoin, however, you should understand the different ways of making such investment — such as the different exchanges available, and different bitcoin investment options — as well as newer types of bitcoin investment opportunities, such as bitcoin ETFs.

What Is Bitcoin?

Released in 2009, bitcoin is the oldest and best known digital currency built using blockchain technology.

Bitcoin is a way to make payments securely and anonymously (although there are limitations: bitcoin transactions can sometimes be traced (<https://cointelegraph.com/news/are-bitcoin-transactions-traceable>), and investing in bitcoin sometimes requires proving your real-world identity (<https://www.bitcoinmarketjournal.com/buy-bitcoin/>)).

Dozens of other blockchain-based digital currencies exist alongside bitcoin, but bitcoin remains the original and most highly valued digital currency.

Why Invest in Bitcoin?

The most obvious reason to invest in bitcoin is that the value of bitcoin versus traditional currencies, such as the U.S. dollar, has climbed very steadily over the past several years.

Other reasons to invest in bitcoin include:

- Its value is virtually unaffected by fluctuations in the stock market. This makes bitcoin a good asset for diversifying portfolios beyond stocks.
- No single authority controls bitcoin or guarantees its value. As a result, a government shutdown would not cause uncertainty for the value of bitcoin in the same way that it would for currencies such as the U.S. dollar.
- Bitcoin can be bought and sold very easily by individual investors, for minimal exchange fees. This makes bitcoin more attractive than investing in the stock market, which can require more skill on the part of the investor and sometimes involves paying large commissions to middlemen.

Of course, bitcoin investment is not without risks and drawbacks, which include:

- Bitcoin is highly volatile. Although bitcoin's value climbed relatively steadily overall in 2017, price drops of 20 percent or more in a single

day are not uncommon. In the less recent past, price drops of more than 90 percent occurred (<https://arstechnica.com/tech-policy/2011/10/bitcoin-implodes-down-more-than-90-percent-from-june-peak/>).

- The use of bitcoin for real-world transactions today remains limited. Bitcoin's value is therefore driven largely by speculation. People want it because its supply is limited and they believe it will become widely used in the future. In this respect, bitcoin is a riskier investment than other investment instruments that are linked to present-day value.

How Can You Invest in Bitcoin?

There are several ways to invest in bitcoin:

- Using a bitcoin exchange. (For a ranking of bitcoin exchanges, click here (<https://moneymorning.com/2017/08/10/how-to-find-the-best-bitcoin-exchange-for-you/>).) Using an exchange, you can buy bitcoin in U.S. dollars. Most exchanges charge a small commission, which varies depending on the volume of the exchange and your method of payment.
- Buying in cash. Matchmaking sites like LocalBitcoins (<https://localbitcoins.com/>) pair people who want to sell bitcoin to people who want to pay for them in cash. To use this option, you have to deposit cash in a physical location; however, this approach can be more private because it does not require registration with an exchange.
- Mining. Rather than purchasing bitcoins, you can "mine" them by performing the computations required to add new bitcoin to the blockchain. Mining requires specialized hardware and consumes a lot of electricity, which means it is not always cost-efficient and is difficult to set up — although cloud-based bitcoin mining platforms are available in which you essentially pay someone else to mine bitcoin for you on their servers.
- Investing in bitcoin ETFs (keep reading for more on these).

Can You Invest in Bitcoin ETFs?

Bitcoin ETFs, which track bitcoin futures, have been rising in popularity, and are set to become available soon (<https://www.cnbc.com/2017/12/20/nyse-files-to-list-bitcoin-etfs-bringing-cryptocurrency-a-step-closer-to-mainstream.html>) on major stock exchanges.

Bitcoin ETFs are an attractive investment option for people who want to add bitcoin to their portfolios while working within their traditional investment frameworks. Bitcoin ETFs may also be more cost-effective for some investors since they can be purchased directly.

Bitcoin 2.0: The Rise of Ethereum

Over the last few years, Bitcoin investors have seen phenomenal gains, and in many cases, fortunes have been made.

For example, back in January 2013, Bitcoins were trading at right under \$100 each. Less than one year later, the price had increased over 11x – to \$1,200.

That's a gain of over 1,000%.

To put it another way – if you had invested just \$500 in Bitcoin in January 2013, you would have made a profit of \$5,500 in less than one year.

However... a new, safer, more ingenious digital currency is about to make Bitcoin's massive rise look like a tiny blip.

And it's already turning ordinary folks into millionaires...

Many investors believe that Ethereum is poised to overtake Bitcoin as the world's leading cryptocurrency. It is commonly referred to as *"the flipping"*.

The "flipping" will occur when Ethereum surpasses Bitcoin's market capitalization. As of right now, Ethereum's market cap is 80.7% of Bitcoin's.

To put that into perspective... in February of this year, it hadn't even yet reached a market cap of \$1 billion. Today, it sits at over **\$36 billion**.

The stars are aligning... and the inevitably moon-bound Ethereum rocket will soon lift off.

The real trick here is to invest before mainstream investors and Wall Street catches wind of this opportunity...

Enter your email address below to learn how you can purchase Ethereum and help ensure your financial independence and security.

5 Top Bitcoin Mining Investment Strategies

Bitcoin mining is an excellent solution for investing in bitcoin without having to pay commissions to bitcoin exchanges or to register an account. However, mining bitcoin effectively is difficult. Keep reading for a list of bitcoin mining investment tips.

Mining refers to the process of performing the calculations that create new bitcoin. Most bitcoin mining today is performed on specialized computer hardware called mining rigs.

Bitcoin mining is not particularly challenging from a technical perspective. You do not need to be a programming expert to do it.

However, the cost margins of bitcoin mining can vary widely depending on which approach you take. If you want to mine bitcoin at a profit, you should keep the following tips in mind.

Approach Bitcoin Mining as a Long-Tail Investment

Bitcoin mining rigs cost about \$5,000 apiece. The cost of maintaining a rig once you own it is relatively low.

You will, therefore, achieve the best ROI on a rig purchase if you use the rig for a long time. A rig that you buy and run for only a few months is not likely to produce enough bitcoin to make your purchase worthwhile, but a rig that you operate for years could become profitable.

For this reason, think of bitcoin mining as a long-tail investment. If you are looking for short-term profits, [swing trading](https://www.bitcoinmarketjournal.com/swing-trading-bitcoin/) (<https://www.bitcoinmarketjournal.com/swing-trading-bitcoin/>) on a [bitcoin exchange](https://moneymorning.com/2017/08/10/how-to-find-the-best-bitcoin-exchange-for-you/) (<https://moneymorning.com/2017/08/10/how-to-find-the-best-bitcoin-exchange-for-you/>) is the best route. You should only get into mining on your own hardware if you plan to run the operation for many months or years.

Use Pooled Mining

In bitcoin's early days, it was feasible for an individual to mine an entire bitcoin.

Those days are long gone. Because bitcoin is designed in such a way that mining becomes more time-consuming as more bitcoins come into existence, and there are many more bitcoins today than there were a few years ago, mining bitcoin on your own no longer makes sense. It now takes something like 98 years (<https://bitcoin.stackexchange.com/questions/13161/how-long-does-it-usually-take-to-mine-a-bitcoin-block>) to mine a single bitcoin by yourself.

This is a lesson that you will learn the hard way quickly enough if you buy a mining rig expecting to create an entire bitcoin.

Save yourself the hard lesson and use a mining pool from the start. A mining pool is a group of miners who work together to create a new bitcoin and share the results.

Consider Bitcoin Cloud Mining

Buying your own bitcoin mining rig is a big investment. Setting up and maintaining it takes time, too.

Fortunately, it is possible to mine bitcoin without such steep capital costs and maintenance burdens. You can use a bitcoin cloud mining service to mine bitcoin on rigs that someone else maintains.

The profitability of cloud mining depends on various factors and is easiest to achieve when you perform large-scale mining operations (because the cloud providers usually charge lower prices if you consume a lot of service). Evaluate the costs and profits of cloud mining closely before taking this approach.

Use Energy Intelligently

Besides the acquisition cost of mining rigs, another major source of overhead for bitcoin mining is the cost of the electricity that is required to run rigs.

Ideally, you will be able to operate your rigs in a location where electricity is inexpensive.

If that is not a possibility, however, you can still approach this challenge creatively. If you live in a place where it is cold, consider placing your rigs in a strategic location of your home or office so that the heat they throw off can be reused to heat your living or working space.

This strategy will not work in all climates, of course. In some cases, your rigs may be too loud to be in close proximity to where you live or work. If you can put up with some noise, this approach will offset at least some of the energy costs of bitcoin mining.

Consider Altcoin Mining

If you want to get into the cryptocurrency mining game but do not have the capital or time to invest in a bitcoin mining rig, you could mine a different type of digital currency instead.

Some altcoins can be mined on CPUs (<http://cpucointlist.com/>). That means you can mine them using an ordinary computer rather than a specialized mining rig (which uses GPUs to crunch numbers).

Most of the altcoins that you can mine on ordinary hardware are relatively obscure, and they may or may not turn out to be worth anything in a few years. Still, if you want to acquire cryptocurrency without purchasing it on an exchange, altcoin mining is another way to get into the game.

Are you interested in finding other technology investments as well? Find out at our Cryptocurrency Millionaire Summit (<https://mediashower.com/ce2/64454/2050/5697>).

CANNABIS INVESTOR'S

R E P O R T

Boost Your Cannabis Profit Opportunities by 2X... 3X... Even 5X Every Month!

Dear Reader,

This is Mike Ward.

I hope you're proud of yourself – because you should be.

You are a part of history in the making.

The news has finally caught on that cannabis will be the next industry to usher in a new wave of millionaires. Major news outlets are calling for legalization...

"2019 is the year the U.S. legalizes cannabis."

– Reported on CNBC

"2019 Will Be the Year of Weed"

– Rolling Stone

And billionaires and CEOs are rushing to stake their claims in this budding revolution.

Former Yahoo CEO Carol Bartz, three-time Super Bowl MVP Joe Montana, and others just invested a combined \$75 million in a California cannabis startup...

Hedge-fund billionaire Leon Cooperman personally invested a boatload of cash in a Chicago-based cannabis cultivator...

And you've heard what former Speaker of the House John Boehner had to say...

"Now is the time to go ALL IN on cannabis."

It's clear that there has never been a better time to start than right now.

But remember – **this is just the beginning.**

Currently, we're reaching the end of Phase 1. That means cannabis is about to enter a stage of MASSIVE consolidation.

This is going to set the stage for unprecedented potential profits for early investors!

And once American legalization occurs, this tiny \$10.8 billion industry could skyrocket to \$100 billion... \$500 billion... or even \$1 trillion – virtually overnight.

Bottom line: This is the largest millionaire-making opportunity of our lifetime.

This Is Why It's ESSENTIAL for You to Have Unlimited, Unrestricted Access to *Cannabis Investor's Report*.

If you're looking for more value...

If you want access to even more profit opportunities in cannabis...

If you want a shot at even bigger, more exclusive plays...

If you want even better access...

Then you *need* to see what I'm about to show you.

I'd like to immediately upgrade you to an ELITE membership.

The **ELITE membership** tier is a smaller network within the *National Institute for Cannabis Investors*.

It's reserved for folks who are ready to take this opportunity seriously (and turn it into a real shot at making serious money).

This "inner circle" puts you closer to our board of advisors. That includes legendary cannabis insiders like Danny Brody and former Speaker John Boehner.

Of course, you'll receive all of the benefits and profit opportunities that come with a standard membership...

But your upgrade will also give you exclusive access to VIP perks, including...

ELITE Membership Perk #1: I'll Pay Your Renewal Fees... FOR LIFE!

As a Founding Member, you received an extremely special opportunity to subscribe at a fraction of the standard retail price.

We've already seen the potential to find the right cannabis stocks *before* the mainstream media catches on...

- GW Pharmaceuticals shot up 1,830%...
- Canopy Growth Corp. skyrocketed 3,813%...
- Aurora Cannabis shot up 2,553%...
- Supreme Cannabis reached peak gains of over 4,800%...
- And Cannabix Technologies is up as much as 5,826%.

Just ONE of these opportunities would have turned a tiny \$300 stake into **\$17,778**.

And right now, you can get at least one opportunity like this... every single month... FOR LIFE.

All it costs is a **one-time payment** of just \$549.

Your membership will NEVER expire.

And you'll NEVER miss out on one of our recommendations, *ever*.

This is a special perk reserved solely for **our ELITE members**.

But that's just the beginning of all the membership enhancements you'll start receiving.

ELITE Membership Perk #2: Unrestricted Access to Our Vault.

Imagine having exclusive access to the most comprehensive, user-friendly database of cannabis companies on the planet.

I'm talking about *every single publicly traded cannabis company*... private companies currently planning their IPOs... and countless revolutionary new startups.

All of the companies in this database have undergone our comprehensive vetting process.

They are rated on a simple 1-5 scale, with 1 being "avoid like the plague" and 5 being "seven-figure profit potential."

Any one of these five-star companies could be one of our next monthly recommendations...

And today, as an **ELITE** member, you can have **instant, unlimited access** to our entire database!

You'll be able to discover these companies *before* the rest of our members even catch wind of them.

Plus, The Vault is simple to use on your computer or even your smartphone.

You can also customize what you're looking for to fit your investing preferences.

Let's say, for example, you only want to look up cannabis tech stocks or pharmaceutical companies. With The Vault, you can easily sort them by market sector.

If you're looking for the "best of the best," you can sort the stocks by rating.

With this special advantage, you'll have a chance to make *more* money faster than anyone else.

Plus, the database is extremely easy to use. Everything is point and click.

But there's another perk that comes with your ELITE upgrade...

ELITE Membership Perk #3: Your Monthly Micro-Cap Spotlight.

As an **ELITE** member, we know you're ready to take this venture extremely seriously.

And that's why we've reserved a special class of cannabis investments just for you – **micro-cap cannabis stocks!**

For most investors, micro-cap investments are simply too risky and volatile to touch.

And they'd be right – they're too risky... *for them*.

But luckily, you have a special advantage... our premier cannabis research right at your fingertips.

Plus, you won't have to bet your life savings on these investments.

In fact, you can bet a small stake... and **turn it into \$100,000.**

That's because micro-cap cannabis stocks have the **BIGGEST** upside of any investment out there.

Take OWC Pharmaceutical Research, for example.

In July of 2016, this tiny micro cap was trading for a measly \$0.015 per share.

So if you decided to throw just \$500 at this company, you would have owned more than 33,000 shares.

And over the next seven months that followed, you would have cashed out on a **21,433% windfall.**

That's enough to turn a \$500 stake in OWC into \$107,667...

A \$1,000 stake into \$215,330...

And a \$5,000 stake into \$1,071,650.

Or take Peak Pharmaceuticals.

It's a cannabis biopharmaceutical company that focuses on developing, manufacturing, and selling medical products based on hemp extracts.

It rewarded investors with an even heftier windfall of **53,471%** – enough to turn \$2,500 into \$1,336,775!

These are rare and exceptional plays.

But with our all-star advisory board and team of researchers analyzing the cannabis sector, we're able to pinpoint micro-cap plays with the most explosive potential.

Every month, I'll send you an **ELITE** member's monthly Micro-Cap Spotlight.

In these Spotlights, we'll introduce you to one of the tiny cannabis companies we believe could see potential windfalls of **20,000%... 30,000%... even 50,000%... or more.**

ELITE Membership Perk #4: A 100% Money-Back Guarantee.

Today, you're able to immediately upgrade your membership for a one-time payment that's **LESS** than the soon-to-be retail price!

That's already an amazing deal.

And you only need to make that payment once – then never again.

All that's required is a minimal, \$4.95-a-year fee for postage and maintenance... and we've already taken care of the first year for you.

Plus, you can take the next 30 days to try out your ***Cannabis Investor's Report ELITE*** membership.

And if at any time during this trial period you decide this **ELITE** upgrade isn't for you, simply give us a call.

My team will immediately refund every single cent of your membership upgrade.

No questions asked!

Are You Ready to Become ELITE?

If you close this page, I can't promise you'll ever see this opportunity again.

By accepting your **ELITE** upgrade today, you will immediately receive...

- **Priority Access** inside the Cannabis Investor's Network...
- Access to the **ELITE** members-only forum...
- At least **two monthly Investment Packages**...
- **Unrestricted access** to our entire Vault of cannabis stocks...
- At least **two monthly Micro-Cap Spotlights**...
- And a **100% Money-Back Guarantee**.

And we have a few more surprises waiting for you in the **ELITE** Members Area.

But you **MUST** act immediately.

We like to keep our **ELITE** ranks small...

So I Can Only Upgrade 100 Members to ELITE Status Today.

After we reach that limit, I'll have no choice but to put you on the waiting list.

So you must take advantage of it **NOW**.

Just fill out the short, secure order form below.

This will upgrade you to a ***Cannabis Investor's Report*** ELITE membership – for LIFE!

Sincerely,

Mike Ward
Co-Founder, *National Institute for Cannabis Investors*

Billing Terms: When you purchase a ***Cannabis Investor's Report*** Lifetime membership, your credit card will be billed \$549 immediately. On your subscription anniversary, your credit card will be automatically billed a small annual maintenance fee of \$4.95 that we must charge to cover administration costs. Without it, we could not make this Lifetime offer to you. If you are dissatisfied at any time over the next 30 days, you can cancel and receive a full refund. Refunds after the 30-day trial period will be issued on a prorated basis until 90 days after the purchase date.

Step 1: Enter Billing Address

fields with (*) are mandatory

☒ Uncheck to ship to a different address.

*If you are prompted to create a password, please create a UNIQUE password. Because we send your username and password via email, we request that you not use a password that you use for secure personal accounts. We do not keep sensitive customer information on our website.

Step 2: Enter Payment Information

If you would like to speak to a Member Services Representative, please call 866.260.0361 or 410.777.8270 (international) between 8 a.m. and 5 p.m. (ET) Monday through Friday.

Secure Credit Card:

Cardholder Name:

Enter Credit Card Number:

Enter only numbers. No spaces or dashes.

Expiration Date:

MM / YY

Card security code:

I understand my credit card credentials will be stored for future renewals of my subscription, and I will be charged at the rate and frequency indicated in my selection above, until I cancel.

Why This Payments Leader Is Crushing the Market by 1,000%

Jun 21st, 2019 | By Michael A. Robinson

It isn't every day that Wall Street fails so publicly.

And no, I'm not talking about a big investment firm or commercial bank going under.

Here's the thing. You and I have been talking about financial technology for several years now. I like to think you have a real inside edge here.

This is a field I literally got involved with in the late 1980s, and have managed to get a piece of every new wave of innovation. Then again, it's well worth it – global payments total some \$100 trillion.

So, for **J.P. Morgan Chase & Co. (NYSE:JPM)** to tell clients it was shutting down a new app for young people, the offering, called Finn, must have been a train wreck.

Young people are some of the most coveted consumers on Earth because you can keep them for decades. For its part, JP Morgan has built a good digital franchise.

But its future now rides heavily on traditional banking... and physical branches, which most young people hate.

That's why today, I am going to tell you about a terrific fintech leader that is crushing the broad market by 1,000%...

The Play to Make While Congress Scrutinizes Big Tech

Jun 18th, 2019 | By Michael A. Robinson

You'd have never known that I took the whole winter off from trap shooting.

After a five-month break, I came right back and had my best scores ever – 99 out of 100 *with 82 straight hits*.

This is no mean feat. After all, trap is a shotgun sport where you have to hit a target the size of a compact disc that flies away from you at oblique angles at about 45 miles per hour.

Now then, as good a shot as I am, I know for a fact I can't hit a moving target – or of any kind for that matter – while wearing a blindfold.

And yet... that's pretty much what Congress and the Trump administration are trying to do.

Here's the thing. The president and members of both parties in the House of Representatives want to investigate Big Tech for alleged antitrust problems.

Today, I'm going to show you why this is a terrible idea. And I'll also show you a great tech-related investment that will power right through all these concerns...

Check it out...
